## SEED SPECIES LIST

All seed on this list is either currently available from our previous collections or is expected from the upcoming crop. Generally, many provenances will be available for a given species.

This list is organized by botanical name including variety, common name, and then followed by provenance or zones available or normally collected by us. A few species we buy in to complement our offering. Where provenance affects pricing, we have identified them as such. **The items indicated with an asterisk (\*) are those where we can provide top ranked Christmas tree provenances.** All seeds are source identified and most are certified. Your interest in having us collect seed of other species would be appreciated and considered.

We characterize ourselves as wholesale suppliers to professionals. Accordingly, we ask for order minimums of fifty dollars and one pound per seed lot. Where you absolutely cannot use a pound (seed does keep), order what you need at 150 percent of the pound price. Trade packets of approximately fifty seeds are \$5 each. Additionally, seed is a biological organism not particularly forgiving of poor handling. While we may indicate a particular quality (e.g. germination as tested by an official AOSCA/ISTA Laboratory), we cannot warrant specific results once the seed is no longer under our care. Naturally, we take every precaution to deliver your order in good condition. Liability is limited to the value of your order.

Beside seed sales, we offer a variety of plants produced from these seeds, as well as seed testing and storage, stratification, plant cold storage, and certain other professional services. Thanks for asking. Prices are subject to change without notice.

### CONIFERS

ABIES		PRICE/LB
<i>A. amabilis</i>	<i>Pacific Silver fir</i>	-all zones 70.00
<i>A. balsamea</i>	<i>Balsam fir</i>	-Northeastern U.S. 97.00
	prov. Nova Scotia	136.00
